

PLEASE TURN OFF YOUR VEHICLE

DID YOU KNOW...?

- ♦ In Colorado, there is a law against leaving a vehicle running unattended.
- ♦ The best way to warm up a cold engine is to drive slowly for the first few miles.
- ♦ In Telluride, if you leave your vehicle idling more than 30 seconds (or 3 minutes to warm up on cold mornings), you can get a ticket.
- ♦ Idling a car for 30 seconds or more uses more gasoline than stopping and restarting.
- ♦ Each gallon of gasoline burned puts 20 pounds of CO₂ into the air. Each gallon of diesel burned puts 22 pounds of CO₂ into the air.
